3 Barrels

Smooth Ceramic Titanium & Tourmaline Barrels for loose, medium or defined curls

Precision Control

Adjustable times give you different curl results

Know About Your Hair Curler

1. Select your desired barrel to use then insert the barrel into the hair curler, ensuring the flat edges line up. The barrel should lock into place by the internal magnets.

2. Plug the hair curler into mains power outlet and turn on.

3. Hold the On/Off button to turn ON.

4. The display will flash. Use the + or – buttons to set the desired temperature. After a few seconds the set temperature will automatically lock; this will be evident by the  symbol being displayed.

5. Once the set temperature has been reached, the display will stop flashing and the curler is ready to use.

6. When finished, hold the On/Off button to switch off. Utilise the safety stand on the barrels to rest the hair curler whilst it cools down.
