Build an Automated living system with these additional items.

Kambrook Power Point Controller / Kambrook Power Point Controller Kit.
- Expand on your automated living options by adding additional Power Point Controllers. Four individual Power Point Controllers or four groups of Power Point Controllers can be used per Compact Remote Control.

Kambrook Compact Remote Control.
- Expand on your automated living options by adding additional Compact Remote Controls. Each additional Compact Remote Control increases the total number of Power Point Controllers that can be operated individually in your system.

Note: A Power Point Controller may only be paired to one individual Compact Remote Control, not multiple Compact Remote Controls.

Kambrook Outdoor Power Point Controller.
- Control your outdoor appliances as well as indoor with the Outdoor Power Point Controller using your existing Compact Remote Control.

Technical Information.

- Working Voltage: 230 - 240V~/50Hz
- Max. Load power: 10A or 2400W

Warranty

The product is guaranteed to be fit for purpose and free from defects for a period of 12 months from the date of purchase. Defects that occur within this warranty period will be repaired or replaced under Australian consumer law. **Proof of Purchase** - This warranty is valid for the original purchase only and is not transferable. Please keep your purchase docket or receipt as proof of purchase and as proof of the date on which the purchase was made. The purchase docket or receipt must be presented with the product when making a claim under this warranty. **Service during the warranty period** - If being returned, please ensure the product is properly packaged so as to ensure that no damage occurs to the product during transit. Also make sure that you have included an explanation of the fault. The consumer is responsible for costs to return the product when claiming warranty. Extent of Warranty - This warranty does not cover manuals, packaging, filters, bags, seals or other accessories. This warranty does not cover batteries or any other consumable item. **Warranty Procedure** - Return the faulty product with proof of purchase to the original place of purchase or contact Winplus Australia via www.winplus.com.au. **Normal Wear and Tear** - This warranty does not cover normal wear and tear of the product or parts. **Exclusions** - This warranty does not cover: - Any defect caused by lack of reasonable care, unauthorised modification or attempted repair by an unauthorised person. - Any product that has not been installed, operated or maintained in accordance with the instructions provided with the product. - Any product that has been used for purposes other than domestic use. - If the product is located outside Australia or New Zealand.

Power Point Controller - Kambrook

Welcome - Thank you for choosing this Kambrook Automated Living product.
All Kambrook Automated Living products are manufactured to the highest standards of performance and safety, and, as part of our philosophy of customer service and satisfaction, are backed by our comprehensive 1 Year Warranty. We hope you will enjoy your purchase for many years to come.

General Information and Safety Instructions

Please read this manual and safety information carefully and follow all instructions. Internal manipulation, modification or attempt to open this product will void all warranties and is deemed unsafe.
Please note that the RF3399 Power Point Controller is for indoor use only and is not suitable for outdoor use. For outdoor use please use the RF3405 Outdoor Power Point Controller.

Warning:

- **Not for outdoor use.**
- **Do not exceed maximum power rating 10A or 2400W.**
- **Children and infirm persons should use this device only under the supervision of a responsible adult to ensure that they can use this device to control appliances safely.**
- **Young children should be supervised to ensure that they do not play with this device.**

Parts List

- 1 x Power Point Controller. - 1 x Instruction Manual.

Features

- **Low energy consumption** - Less than 1W power consumption when in standby state.
- **Safety** - If a power failure occurs, the Power Point Controller automatically switches to the off position to ensure a safe environment and reduce power wastage.
- **Manual control or remote control** - Power Point Controllers have a manual ON switch so devices can be controlled manually as well as by the Compact Remote Control.
- **No interference** - Each Power Point Controller button has its own code set, which means no interference and stable performance.

Use with other Kambrook Automated living products to increase features

- I**ndividual control** - The Compact Remote Control (sold separately) can control up to 4 individual Power Point Controllers using its 4 numbered buttons.
- **Group control** - The Compact Remote Control (sold separately) can control up to 10 Power Point Controllers as a group per numbered button. Each Power Point Controller assigned to a group can only be operated by the Compact Remote Control as a group. All on or all off.
- **Room to room control** - The Compact Remote Control (sold separately) works through walls and ceilings.

Instructions

How to program a Kambrook Compact Remote Control (sold separately) to the Kambrook Automated Living Power Point Controller.

1. Unplug the device you wish to control with the Power Point Controller from the power point.
2. Ensure that the power point is switched on.
3. Plug in the Power Point Controller.
4. Plug the device you wish to control into the front of the Power Point Controller.
5. Ensure the device is switched to on (if applicable).
6. Pair the Power Point Controller with the Compact Remote Control.
a. Press and hold the manual ON button on the Power Point Controller for 5 seconds, the blue LED light marked "Indicator" on the Power Point Controller will begin to flash.
b. Release the On button. Select the desired numbered button on the Compact Remote Control (sold separately) that you wish to assign to this particular Power Point Controller to.
c. The LED indicator light on the Power Point Controller will then stop flashing, indicating that the Power Point Controller has been paired successfully with the Compact Remote Control. You can then control the Power Point Controller by pressing the corresponding numbered button to switch on or off any device or appliance plugged to this Power Point Controller.
